

Susannah Skinner

CELLULAR

Opening 6pm 24th March 2018

Susannah Skinner's new body of work is abstracted from an intimate exploration of landscape. Developed from an intrinsic way of perceiving all that forms landscape (organic and manmade), this body of work evolved from the artist's previous studies in botany and microbiology. CELLULAR references a particular way of looking, an appreciation of the minutiae that constitute the whole.

Nyisztor Studio
